

UPPARA VINOD

Full Stack Developer | React | Node.js | MongoDB | TypeScript

Pattikonda, Andhra Pradesh | upparavinod7@gmail.com | +91 7680841759 | github.com/upparavinod7 | LinkedIn | Portfolio

Professional Summary

Motivated Full Stack Developer (CGPA: 9.45/10) with active industry experience building production-grade web applications using the MERN stack and TypeScript. Skilled in designing RESTful APIs, implementing JWT authentication, building responsive UIs with React and Tailwind CSS, and deploying scalable backend services with Node.js and Express. Experienced in complete software development lifecycle, Git-based collaboration, and Agile workflows.

Education

B.Tech CSE (AI & ML), Joy University 2023–2027
CGPA: **9.45/10** *Relevant Coursework: Data Structures & Algorithms, DBMS, OOP, Web Technologies, Operating Systems*
Narayana Junior College (MPC) 2021–2023 96.1% **Narayana School (SSC)** 2021 GPA: 10/10

Experience

Junior Developer Intern | Hyperready Jan 2026 – Present

- Developing full-stack web applications using React (hooks, context API), Node.js, Express, and MongoDB; built 10+ RESTful API endpoints with input validation and error handling.
- Implemented responsive, cross-browser UI components with Tailwind CSS; improved page load performance by optimizing component re-renders.
- Built CRUD modules for core business entities; designed MongoDB schemas with proper indexing and query optimization.
- Collaborated via Git/GitHub (feature branching, pull requests, code reviews) within an Agile development team.

Machine Learning Intern | Unified Mentor Aug 2025 – Sept 2025

- Developed Flask-based web application backend serving ML model predictions via RESTful APIs.
- Built responsive frontend prediction interfaces; integrated backend Python services with web UI.

Projects

CareerOS AI – Full Stack Career Intelligence Platform GitHub

- Architected and built a complete MERN + TypeScript SaaS application with modular, scalable backend services and RESTful API design following REST best practices.
- Implemented secure JWT-based authentication with role-based access control; built session management and protected route handling on both frontend and backend.
- Developed real-time job search integration, analytics dashboard with dynamic charts, and job application tracking system with full CRUD functionality.
- Designed MongoDB data models for users, jobs, and applications; optimized queries and implemented pagination for large datasets.

Smart Music Player – OpenCV + Web Integration

- Built Python-based computer vision backend exposing emotion detection results as an API; integrated with a responsive web frontend for real-time music recommendations.
- Designed end-to-end data flow from webcam capture to dynamic playlist rendering in the browser.

Price Prediction Web Applications (Vehicle & Mobile)

- Developed Flask backend with ML inference endpoints; created interactive HTML/CSS/JS frontend with form validation and real-time prediction display.
- Built reusable UI components and ensured mobile-responsive layout across device sizes.

Technical Skills

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+), TypeScript, Tailwind CSS, Bootstrap, Responsive Design
Backend: Node.js, Express.js, Flask, REST API Design, JWT Authentication, Middleware Architecture
Databases: MongoDB (Mongoose ODM), MySQL, Schema Design, Query Optimization
Languages: JavaScript, TypeScript, Python, Java, C++, SQL
Tools & DevOps: Git, GitHub, VS Code, Postman, npm, Webpack (basic)
Core CS: Data Structures & Algorithms, OOP, DBMS, System Design (basic)

Certifications

AWS Solutions Architecture Job Simulation – Forage Technology Job Simulation – Forage Data Analytics Job Simulation – Forage

Leadership & Activities

Vice Chairperson, ACM Student Chapter

- Led technical workshops on web development and software engineering; organized hackathons and coding events for 100+ student participants.
