

UPPARA VINOD

Software Development Engineer | DSA | Java | Python | System Design

Pattikonda, Andhra Pradesh | upparavinod7@gmail.com | +91 7680841759 | github.com/upparavinod7 | LinkedIn | Portfolio

Professional Summary

High-achieving CSE (AI & ML) student (CGPA: 9.45/10) with strong foundations in Data Structures, Algorithms, and Object-Oriented Programming. Experienced in building scalable, production-ready software systems using Java, Python, C++, and JavaScript/TypeScript. Skilled in backend development, REST API design, database management, and software engineering best practices.

Education

B.Tech CSE (AI & ML), Joy University 2023–2027
CGPA: **9.45/10** *Relevant Coursework: DSA, OOP, DBMS, Operating Systems, Computer Networks, System Design, Algorithms*
Narayana Junior College (MPC) 2021–2023 96.1% **Narayana School (SSC)** 2021 GPA: 10/10

Experience

Junior Developer Intern | Hyperready Jan 2026 – Apr 2026
• Developed and maintained full-stack web applications using React, Node.js/Express, and MongoDB; contributed production-grade features from design through deployment.
• Designed and implemented RESTful APIs with proper request validation, error handling, HTTP status codes, and middleware architecture.
• Applied SOLID principles and modular architecture to ensure maintainable, testable code; participated in code reviews and Git-based collaborative workflows.

Machine Learning Intern | Unified Mentor Aug 2025 – Sept 2025
• Developed Python-based ML software systems with Flask APIs; wrote clean, documented code for data preprocessing pipelines and model serving modules.
• Demonstrated ability to work independently on software delivery from problem statement to deployed solution.

Projects

CareerOS AI – Large-Scale Career Platform (MERN + TypeScript) GitHub
• Designed a scalable SaaS-style architecture with separation of concerns: authentication service, job search service, analytics service, and application tracking module.
• Engineered efficient MongoDB data models with indexing strategies; built paginated APIs handling large datasets with optimized query performance.
• Leveraged TypeScript throughout the stack for type safety, reducing runtime errors and improving code maintainability.

Smart Music Player – Computer Vision System
• Designed a multi-module software system: image capture layer, CNN-based inference engine, and recommendation output layer; each module independently testable and replaceable.
• Applied OOP principles (encapsulation, abstraction) to organize model loading, preprocessing, and prediction into clean class hierarchies.

Price Prediction Platform – End-to-End Software Delivery
• Built complete software solution from data ingestion to web deployment; implemented clean separation between data layer, business logic, and presentation layer.
• Wrote reusable preprocessing utility functions and modular ML pipeline components to enable rapid experimentation and deployment.

Technical Skills

Languages: Java, Python, C++, JavaScript, TypeScript, SQL
DSA: Arrays, Linked Lists, Trees, Graphs, Dynamic Programming, Sorting/Searching, Recursion, Hashing
Backend: Node.js, Express.js, Flask, REST API Design, JWT, Middleware
Frontend: React.js, HTML5, CSS3, Tailwind CSS
Databases: MongoDB, MySQL, Schema Design, Indexing, Query Optimization
OOP & Design: SOLID Principles, Design Patterns (MVC, Singleton, Factory), OOP (Java, Python, C++)
Tools: Git, GitHub, VS Code, IntelliJ IDEA, Postman, Jupyter
Core CS: DBMS, Operating Systems (basic), Computer Networks (basic), System Design (basic)

Certifications

AWS Solutions Architecture Job Simulation – Forage Technology Job Simulation – Forage Data Analytics Job Simulation – Forage

Leadership & Activities

Vice Chairperson, ACM Student Chapter

• Organized technical workshops, coding competitions, and software engineering knowledge-sharing sessions; led a team of 10+ committee members.
